

4 YARD CONTAINER

Waste

Recycling

Description:

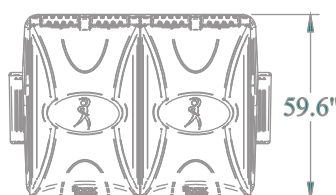

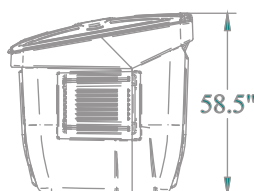

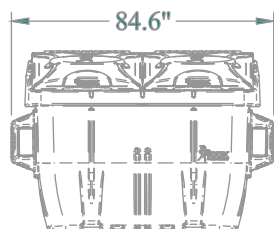

- ▷ One piece molded with rounded shape to maximize strength and resistance.
- ▷ Double walled, molded-in fork pockets reinforced with galvanized steel sleeves.
- ▷ The top rim of the container is molded with a double wall and is sealed by plastic fusion to add to the container's resistance to torsion and overall strength.
- ▷ Can hold up to 5000lb.
- ▷ Will resist harsh chemicals and petroleum based liquids.
- ▷ Is very easy to clean and will look forever new.
- ▷ Our special resin, PolytrA™, ensures high impact and stress resistance even below -40°F/°C!
- ▷ Containers will not rust, crack, bump or leak, they are maintenance free (no welding repairs or paint touch-ups) during the whole container's life.
- ▷ Made of 100% recyclable plastic.
- ▷ Stackable to optimize shipping.
- ▷ Available in custom colors and permanent molded-in branding (minimum order).
